---

## Purpose

Defines interoperable exchange boundaries between DigiEmu Core and external verification systems.

## Artifact Exchange

Implementations MAY exchange snapshot bundles, verification results, and audit references through stable schemas.

## Non-Claims

Interop artifacts MUST explicitly define what DigiEmu does not certify, attest, or infer.

## Boundary Preservation

External systems SHALL NOT redefine canonical DigiEmu state identities.

# Audit Transport

Structured evidence SHALL remain portable across verification environments.

---

This document is part of the DigiEmu Core 2.0 draft review bundle. GitHub remains the normative technical source of truth.
