

DigiEmu Core 2.0

Draft 1 — Specification

Status	Draft Review Document
Release Line	Core 2.0
Repository	https://github.com/DigiEmu/core
Public Standard	https://digiemu.com

Purpose

Defines deterministic decision-state reconstruction, canonical replay, and verifiable state hashing for DigiEmu Core implementations.

Core Principles

Deterministic replay, canonical serialization, SHA-256 state hashing, evidence-oriented verification, interoperability boundaries.

Snapshot Integrity

Snapshots MUST resolve to a canonical representation whose SHA-256 hash remains reproducible across compliant implementations.

Verification

Verification SHALL reconstruct state deterministically and compare recomputed hashes against stored snapshot references.

Governance

Normative updates SHALL preserve audit traceability and release-line consistency.

This document is part of the DigiEmu Core 2.0 draft review bundle. GitHub remains the normative technical source of truth.
